## GREAT FUTURE OF

Nevada Operator Is Surprised That Salt Lake Is So Dilatory.

SECOND WELL IS POINT OF INTEREST

Companies All Bound for Depth Where Gushers Are Anticipated.

"I am surprised that Salt Lake money is doing so little in the Virgin oil section when compared with Los Angeles and Goldfield," stated F. E. Allyn of Ely, Friday. Mr. Allyn had just returned from the section in question, and he is thoroughly alive to the possibilities of the Virgin field, and absolutely confident as to the futur of the same. He stated:

"The find of the first oil sands i the second well, or the McKenzie wel has created no end of favorable con ment among the experts who are on th scene. I am interested with Ely per ple in two companies adjoining the Mo

scene. I am interested with Ely people in two companies adjoining the McKenzie ground. These two companies are called the Big Four and the Virgin Central Oil companies. We have a rig for each now en route to the properties, and we will leave no stone unturned in sinking to depths for oil.

"Depth is the point now sought throughout the district, and I am of the opinion that wells must reach from 1200 to 2000 feet before finding the real deposits of oil, with that depth look for gushers. There are a dozen rigs now working; we met four going in from Lund; and at Lund we learned that six more are expected there at any time. I met fully fifty people on their way into Virgin. They looked to me like they were on business bent, for a person does not make that trip unless they mean business at the end of their journey.

"The great drawback so far has been the inaccessibility of the fields. It is a tiresome and difficult trip to Virgin, but I am glad to say that the Kimball brothers are preparing to establish one of their stage lines from Lund to Virgin. All Nevadans who know what the Kimball boys have done for transportation in Nevada appreciate how fortunate the Virgin fields are to secure their efforts down that way. But Salt Lake should wake up to the real possibilities of this Utah section. It is worth attention, and worth spending money on."!

#### PAY ROLLS CALLING FOR SOME WORRY Yankee C. 40 45 40 45

A well-known mining man smiled in spite of himself Friday upon receiving a message from his mine superintendent in Nevnda, asking that several thousand dollars cash be forwarded immediately to pay off the men and teamsters employed by the company. It is a request that has been very general for several days in Sait Lake, and possessors of mining properties in the Sagebrush State frankly admit that they are up against one of the hard-set games they ever attempted to handle. Said one, Friday:

"For obvious reasons I do not wish to have my name or the name of the company used, but the situation is far from being a comfortable one. My company has all of \$40,000 on deposit in three different banks. It was cash when we put, it in, but it is cashier checks or ordinary checks now. And the average Nevada miner don't want a check. He looks at it as if it were a bit of dirty paper, unfit for spending purposes. He wants cash. So I have prepared a statement to be posted up in the mine to the effect that the company has the sum of \$40,000 in three banks, yet is unable to draw out enough to meet a month's payroll. Those who prefer cash to checks will be given the opportunity to quit work. Now, isn't it a pretty howdy-do to be forced to posting up such a notice as that?"

There is no fun in running a mine under such conditions, especially when a

There is no fun in running a mine under such conditions, especially when a company is compelled to employ forces of foreign workmen who do not know any sort of money but the kind that jingles in the pocket. A canvass of mining companies operating in Nevada brings forth the same complaint, and telegrams continue to arrive calling for the hard cash, and quick at that.

and quick at that.

"Money, money everywhere, but not a cent to spend," was the way one mine manager put it, as he thought of his company's \$100,000 deposit.

#### ASK CONGRESS TO DO AWAY WITH 1907 WORK

Considerable interest has been aroused in this city over Congressman Bartlett's plan to have the coming session of Congress pass an act by which all assessment work on mining claims for 1907 shall be done away with. The plan meets with approval in Salt Lake, and it illustrates how Nevada feels the present financial stringency. C. L. Dignowity, the well-known Nevada mining man, in a recent interview said:

stringency. C. L. Dignowity, the well-known Nevada mining man, in a recent interview said:

"This is a matter that should be taken up at the meeting of the Mining congress at Joplin. Mo., this month. The members of the Mining congress, as well as every chizen having the welfare of the poor prospector at heart, should join in signing a memorial asking Congress to remit location work for this year. That body can easily make the law retroactive, so that even if it is not passed until after the first of the rooming year, it would result in saving the property of the miner who at this time has not enough money to do the work. If every citizen would see to it that his Senator or Congressman is asked to help in this moye the law will be passed. Similar action was taken in 1991. That law saved the property of thousands of poor prospectors who after the period of depression had passed, because wealthy men and are now among the most successful mining men of the United States. The same conditions now prevail and it is time for us to zet."

Ore and Pullion. The cre and bullion receipts for Fri-13F. given by McCornick & Co., were as follows: Ore, \$48,000; bullion, \$60,000.

Metal Market. The metal quotations for F. iday, posted McCornick & Co., were as follows: Sile. 151c; lead, \$4.75; copper castings, ic: copper cathodes, 122g.

New York Letter.

New York Letter.

James A. Pollock & Co., bankers and brokers, 6 West Second South street, furnish the following, received over their private wire yesterday afternoon:
Walker Bros. Stock Letter.—New York—The market held steady today and the trading was very much restricted. Union Pacific was quite strong all day and there seemed to be very little liquidation. On the whole, the market acted very well. There was heavy trading in United States Stael Ss and the market took the selling very well. It is hard to tell what the bank statement will be like.

The Pieneer sampler on Friday released the following number of cars of ore: Ltah, 6; filehe, 5. The Taylor & Etunton company re-ieneed the following Utah, 13; Idaho, 1; Nevada, 2.

## UTAH IS AFFECTED MORE THAN COLORADO

Mines of Colorado Have Few Ores Under Ban of Conditions.

While Utah mines are being operated on a limited scale, especially copper properties, awaiting a clearer sky for copper, the famous old State of Colorado is marching onward, very little disturbed over the red metal situation Mr. Brunton of the ere sampling firm of Taylor & Brunton is in Salt Lake,

on one of his usual visits of inspection, and he stated yesterday that while Colorado may envy Utah in the possession of her great copper mines, just at present the State is not overly particular whether her mountains con-tain vast red metal deposits or not.

He said:
"Colorado does not produce much "Colorado does not produce much copper, so the present situation is not felt so keenly there as in this State. But, mind you, I do not degire to create the impression that Colorado would not like to have some of the Utah copper deposits. The State is not a very large lead producer, either; outside of Lesdville the metal is little mined, but such as we have over the line carries such a splendid excess of iron that the smelters are glad to get it at all times. But like Utah, Colorado is on a clearing-house basis, yet all are hopeful and confident for better times to come."

Mr. Brunton states that he is en route to Nevada camps, and expects to spend some time in getting closer to the Nevada in San Francisco.

## BISCUIT MINE IN FINE SILVER ROCK

Company Brings Property to Stage Where Shipments Will Be Regular.

FAMOUS ORE BODY FOUND AT DEPTH

Chute Being Developed on Eight-Fifty and Nine Hundred Levels.

Some mighty handsome ore has been brought to Salt Lake from the mines of Nevada, but it is doubtful if any property can display so fine an assortment as the Buiscuit Mining company, received Friday from the Cherry Creek property of that company. General Manager A. E. Hyde has just returned from the mine, and brought with him what the mine management selected as an average sample of the shipping ore

an average sample of the shipping ore now being encountered in this noted old producer of White Pine county. The ore contains the chloride of silver and brittle silver, each piece being worthy of a place in a cabinet.

Mr. Hyde stated that the rock came from the 850-foot level of the mino. A winze was driven from the 800-foot level near the edge of the famous ore chute, which was stoped from the 800 to the surface in the early days. In those days the ore made history for the Buiscuit, and the same ore body promises to make more history of bonorable character. This winze, on reaching the 850 point, began looking promising, and a drift was run to the chute proper. Mr. Hyde states that this drift has followed the ore for 65 feet and a crossent sent into the body for seven feet shows no end of the ore. All the various workings are being pushed against the same ore proper or the surface of the ore. All the various workings are being pushed against the same ore into the same ore or the chute of the same or the same of the ore.

shows no end of the ore. All the various workings are being pushed against the same quality of rock.

For the purpose of securing a safe average of the breast of the drift, Mr. Hyde sampled the same carefully and states that the ore will average 170 ounces silver to the top. On this class of rock the management is hoisting 25 skips every three days. A car of ore is loaded now, ready for shipment, while the company added to its team outfit so as to bring in one car a week from now on. Just before leaving the mine, states Mr. Hyde, he saw the drift on the 900-foot level break into the same chute and the same character of rock. the 300-1001 level preas into the same chute and the same character of rock, so he is confident that there are many seasons of splendid success ahead of the company. The Biscuit, he states, never before looked so promising, and the condition of the property has created a very favorable impression where the facts are known.

### ZENOLI IS SENDING IN SPLENDID ROCK

Nevada Property of Utahns Is Responding Like Veteran to Development.

Not long ago two Italians owned and operated a property over in Nevada, sear Palasade. They knew what they had in a way, so did several who wanted the mine, when two Salt Lakers happened to come along with the cash, and won the day. The mine became the property of the Zenoli Mining company, and if ore shipments tell the tale, the Zenoli was one of the distinct finds of the season in that State. The original group was not large, so the new owners proceeded to buy up much of the surrounding territory. A shipment of 1000 tons brought in the net sum of \$30,000, and that was more than the whole property cost the Zenoli company. Since last March the company has marketed over \$40,000 net worth of ore, and the most of it was developed by the former owners, some being rescued from the dump they had made. Lakers happened to come along with

had made. On Friday the Zenoli company sent a car from the sampler to the smelter. Another car is due in Salt Lake any day, while a third is somewhere beday, while a third is somewhere between the shipping point and this city. The ore contains mostly silver, although sometimes the rock carries enough lead to bring the amount of the chock up a bit. A general average of these shipments is stated to be close to 206 ounces silver per ton, and there is a magnificent tonnage now available in the economy. is a magnificent tonnage now available in the property. A short time ago the management extended the possibilities of the group by doing some work on one of the far corners, thought then to be in line for the vein system. This proved to be the case, and the Zenoli is having its tourage augmented daily

is having its tonnage augmented daily at a very generous gait.

The property is finely situated, being only a mile and a quarter from the raifroad tracks. The company has nothing but ore to sell, and the company purse is assuming a fatness that is highly gratifying to those at the helm of the organization. Before the close of the year the Zenoli will have achieved sufficient to land it in the large producers of the sagebrush State, and Salt Lakers are the sole owners of the property.

#### PERIOD OF REDEMPTION ON PROPERTY EXPIRES

RICHFIELD. Nov 8.—E E Hoffman has just returned from Sait Lake City, where he spent the past week on business in connection with the Gold Mountain Consolidated Mining company. The period of redemption had expired on all the Annie Laurie properties, and Mr. Hoffman went to examine the records in the Federal court and prepare a deed conveying all real estate which had been sold subject to the right of redemption by the company. The deed was prepared and the real estate was conveyed to the Gold Mountain Consolidated Mining company, they having purchased the right of the Buhl Kimberly corporation, the purchasers at the sale.

Now the Gold Mountain Consolidated Mining company owns all of the property formerly owned by the Annie Laurie company.

This beyond any question of doubt in-

formerly owned by the Annie Laurie company.

This beyond any question of doubt, indicates that the development work in the mine will be extensively carried out. The new company has held back work for the reason that it did not wish to develop a large body of ore and then have the former owners come and redeem the property, thus receiving the benefit of the work.

### GRAND CENTRAL IS FORCED TO CLOSE DOWN

Owing to the fact that the Bingham Consolidated company has determined to handle no those custom ores for the time being, the Grand Central Mining company has been compelled to close down the mine. The company was a shipper to the Bingham plant, and for that reason alone the property must lie lide until such time as the Grand Central officials can make other arrangements with the smelters of this valley. Fresident Holorook stated yesterday that the property was in ideal physical shape, and nothing could be farther from his desire than closing down this historical old producer and dividend payer. With other areason why the Grand Central should not begin operations again at any time

#### CASTING COPPER SHAFT PENETRATING FINE ORE

"I fear there is little wisdom in giving out good news these days," stated W. C. Orem on Friday, "People during the past few weeks have been schooled to receive had news, and many expect such to come without interruption. But we have nothing but good news from the Nevada Douglas." Mr. Orem, to prove his statement displayed an assay sheet showing the average value set by set of the Casting Copper shaft in its progress to depths at Yerington. The shaft is down its feet, and the average of the whole distunce is \$5 per cent copper. The highest assay secured was 18.5 per cent copper.

ECLIPSE LEASERS ARE

SACKING GOLD ORE

The leasers are sacking ore with feverish baste and regularity " was the burden of the news contained in a lotter to the local offices of the Seven Troughs Eclipse company, received yesterday. There are several blocks of this Salt Lake property out on leases, and those who see the activity and results there are more than entimusable. This ore will run above \$100 on an average some of it belong the richest sort of high grade. The company is driving a winse from the traited will not run below \$100 per ton in gold. Seven Troughs has the center of the stage, and the rock being penetrated will not run below \$100 per ton in gold. Seven Troughs has the center of the stage, and who Eclipse is among the busilest in the camp.
